

SEASONAL WOOD BURNING RESTRICTIONS BEGIN NOV 1ST

USE ONLINE AND MOBILE TOOLS
FOR BETTER MONITORING OF
DAILY AIR PARTICLES
airquality.utah.gov

THE UTAHAIR APP

Three basic symbols are all you need to know that indicate unrestricted, voluntary and mandatory air actions.

Unrestricted Action: Wood and coal burning stoves or fireplaces may be used, but use them in a proper manner to reduce smoke emissions.

Voluntary Action: Voluntarily do not use wood and coal burning stoves or fireplaces. Reduce vehicle use by consolidating trips. Industry should optimize operating conditions to minimize air pollution emissions.

Mandatory Action: Wood and coal burning stoves or fireplaces must not be used. Reduce vehicle use by consolidating trips. Industry should optimize operating conditions to minimize air pollution emissions

There are fines for burning on mandatory action days. The penalties reflect the need to address the levels of air pollution along the Wasatch Front.
