OUR MISSION:
The Tooele County Health Department serves as a leader in public health and aging services for our diverse community, by promoting health and safety, striving to prevent avoidable disease, assessing the health of our community, developing policies, providing services and education, and protecting the environment to assure quality of life.

OUR VISION:
A healthy and safe community for all Tooele County residents.

OUR CORE VALUES:
1. Collaboration: We work together internally and externally for the mutual benefit of the community through the sharing of information, resources, and ideas to achieve a common goal.
2. Excellence: We strive to provide the highest quality services through individual efforts, evidence-based practices and a culture of quality improvement.
3. Innovation: We apply the most advanced technology, information and research to become a revolutionary leader in public health.
4. Integrity: We act with a consistency of character and take individual ownership and accountability for our actions.
5. Diversity and Inclusion: We treat all individuals with respect, dignity, acceptance, and compassion.
6. Service: We provide quality service to all individuals both internal and external.

A MESSAGE FROM OUR DIRECTOR:

It’s my pleasure to bring you this 2019 Annual Report, featuring highlights of the work performed by our staff to help our community to have a healthy place to work, live, and play. 2019 was a year of great progress for the Tooele County Health Department (TCHD). As we gather data and stories related to our efforts, we are reminded of the far-reaching impacts of the programs we provide. We are also reminded that we can’t do this work without our wonderful staff, our community partners, and the Tooele County Board of Health. I personally thank them all for their support, and for allowing TCHD the honor of working towards our mission.

Across all areas of our County, there are those living with or working to prevent chronic or communicable conditions, needing support for a young child with developmental challenges, needing food assistance within their family, or perhaps simply wanting assurances that their food, air, and water are safe. In a nutshell, it is Public Health that provides, focuses, and directs efforts to meet these diverse needs.

Tooele County Health Department continues implementing our Community Health Improvement Plan to promote healthy living and reducing obesity, improving mental health and preventing suicide, and reducing substance abuse. Working in tandem with our community partners, we are putting in the groundwork to make changes that can bring about long lasting improved health in our community and in the lives of our residents.

An area where we have seen great progress is with the transit within our valley. Tooele County's partnership with the Utah Transit Authority has helped bridge the gaps for transit within and outside of Tooele County. New and improved routes have been expanded offering more transportation services in Tooele, Stansbury Park, and Grantsville.
One area of particular concern right now is vaping and the increased risk for youth nicotine addiction. Since their introduction to the U.S. market electronic cigarettes (or vape devices) have become extremely popular, especially among youth and young adults. Innovative designs, sweet and minty flavors, and target marketing using social and digital media have been linked to high vape rates among youth and young adults. The long-term effects of inhaling heated and aerosolized solvents, flavoring chemicals, and other carbonyl and volatile organic compounds are unknown. Vaping devices lack regulations or standardization in their designs and can be customized by their users to deliver drugs other than nicotine. Regulations that make it harder for youth to access tobacco products are part of evidence-based practices in tobacco prevention and control and are expected to reduce youth use of vape products. To address the rapid rise in vape product use among Utah youth, the Utah Department of Health (UDOH) along with all local health departments, have proposed new rules that would increase the price of tobacco and vape products, limit the total number of tobacco retailers, and restrict flavors and where flavored tobacco and vape products are sold.

Another exciting area we celebrated success in during 2019 was the opening of Rabbit Lane as an active transportation pathway, which is an integral part of the Tooele Valley Pathway. Active transportation is movement using the body, such as walking, running, jogging, or skating. Accessible trail systems help get people started with outdoor activity because they make all levels of people feel comfortable.

Everything we do is focused on health and safety, and everything we do requires partners. In Tooele County, we are unusually fortunate that this work is so strongly supported by our community. It is this support, and our partnerships, that allows us to succeed and makes our work so truly rewarding. Our staff and I sincerely thank you and look forward to continued partnership and even more progress towards a healthier and safer future.

Jeff Coombs
Executive Director/Health Officer
"Pioneering spirit should continue, not to conquer the planet or space... but rather to improve the quality of life." — Bertrand Piccard

OUR STRATEGIC PLAN:

GOAL: Tooele County Health Department (TCHD) will be recognized by the community as the primary source of public health information.

GOAL: TCHD will provide high quality health information to stakeholders and the community to promote well-informed decisions.

GOAL: To ensure that the TCHD provides sufficient resources to accomplish the Community Health Improvement Plan (CHIP) goals.

GOAL: Evaluate the CHIP progress annually and update the CHIP as appropriate.

GOAL: Ensure the TCHD workforce is adequately oriented, trained and provided with ample opportunity and resources for professional development in order to achieve excellence in service to all.

GOAL: All TCHD employees feel informed and empowered to make decisions and perform in their capacity.
COMMUNITY HEALTH ASSESSMENT:

The Community Health Assessment helps local public health system members identify the most pressing health issues in Tooele County. Through analysis and interpretation of data collected from a variety of sources, public health leaders in Tooele County were able to make informed decisions and develop appropriate interventions to affect change, resulting in a healthier community for all Tooele County residents.
COMMUNITY HEALTH IMPROVEMENT PLAN:

The Tooele County Health Department is committed to making measurable improvements in the health and safety of our community. As part of an ongoing community health improvement process, community partners from various organizations worked together to develop Tooele County’s Community Health Improvement Plan (CHIP). Health priorities selected by community partners for the CHIP are based on data presented in the Community Health Assessment. Despite the improvements made and efforts expended in promoting health and wellness, too many of our citizens are overweight or obese, abuse substances, and suicide rates continue to increase. The challenges we face require a call to action. The CHIP provides the framework for mobilizing community action through partnerships to improve the health of all Tooele County residents, particularly our most vulnerable citizens. Three data-driven health priorities have been identified and are being addressed. Our community must share the ownership of these complex public health problems and we will need diverse community engagement to show improvement. Improved community-wide alignment of our efforts and resources across all areas will be essential to meeting the goals established for each health priority. By working together, we can improve the health of the citizens we serve and achieve our vision of a healthy and safe community for all Tooele County residents.
CHIP HEALTH PRIORITY AREAS:
1. Promoting Healthy Living
2. Improving Mental Health & Preventing Suicide
3. Reducing Substance Abuse
CHIP GOALS:
Promoting Healthy Living and Reducing Obesity

Goal 1: Increase the daily consumption of nutritious foods.
Goal 2: Increase the level of daily physical activity among residents.
Goal 3: Increase the percentage of the population at a healthy weight.

Improving Mental Health and Preventing Suicide

Goal 1: Increase social norms supportive of help-seeking and recovery.
Goal 2: Increase prevention and early intervention for mental health, suicidal ideations, and substance misuse and abuse.
Goal 3: Increase support for survivors of suicide loss.

Reducing Substance Abuse

Goal 1: Increase awareness and decrease availability of all abusive substances.
Goal 2: Increase substance abuse treatment referrals and prevention programs.
2019 SNAPSHOT:

April is National Public Health Month and as friends of public health and outstanding volunteers the following individuals were recognized for helping us as public health in our achievements. Dr. Alma J. DeLaMare for Outstanding Volunteer Award, Frank Reed for Outstanding Volunteer, Sheldon Birch of Birch Family Pharmacy for Friend of Public Health Award, and Lisa Carpenter of Tooele City Business Licensing for Friend of Public Health Award.
Lunch & Learn for Caregivers is one of Aging Services opportunities to provide information and support to those in our community caring for older adults. We facilitate these free weekly educational classes for a month each spring and again in the fall. Experts present content on a variety of topics that are pertinent to caregivers, such as community resources, coping techniques, and practical tips. Even professional caregivers attend such as nursing students and CNA faculty. This year was the first time we took our classes to the Stansbury Park community and they were very well received and attended.
AGING SERVICES DIVISION

SENIOR CENTERS:

The Senior Center Staff work together to implement and support programs, events, and activities, that promote the well-being of our Older Adult population in Tooele County in the Tooele, Grantsville, and Wendover area. Utilizing staff and resources effectively has proven to help cultivate friendships and relationships with seniors from the different communities. We serve an average of 140 meals during our combined luncheons. Seniors enjoy getting together for good company, a good meal, and entertainment. This year Tooele and Grantsville worked together on a holiday services project for the Meals on Wheels clients. Volunteers in the community helped to deliver these items. We serve approximately 125 meals to our home bound senior residents.
AGING SERVICES DIVISION
TRANSPORTATION BUREAU:

In 2019 Tooele County has seen some amazing progress with the transit in our valley. Tooele County's Aging Services Transportation Bureau's partnership with the Utah Transit Authority has helped bridge the gaps for transit within and outside of the County. We have expanded all morning, midday, and evening service throughout Tooele, Stansbury Park, and Grantsville.

**New Route F453:**
- New Midday trips (8 AM - 4 PM)
- 60-min service
- Tooele and Benson Grist Park and Ride to TRAX Green Line and International Center
- Connects to 217 or 551

**Improved Route F400:**
- All-Day Service (5:35 AM - 6:51 PM)
- Additional early-morning trips
- Modified routing on 1280 N Main Street
- Serves Tooele Senior Center on-street, not in parking lot (much safer)

**Revised Route F402:**
- All-Day Service (7:27 AM - 5:20 PM)
- Serves Tooele Senior Center on-street, not in parking lot (much safer)
AGING SERVICES DIVISION
TRANSPORTATION BUREAU:

**Improved Route F451:**
- Converted to Fast Bus ($2.50 fare)
- More stops on Main Street
- Expanded Morning Times (5:04 - 8:19 AM)
- Expanded Evening Times (3:44 - 7:04 PM)

**Improved Route 454:**
- Replaces Route F401
- More Morning Trips (5:11 - 8:50 AM)
- More Evening Trips (3:12 - 6:59 PM)
- Grantsville Loop expands to SR-112, Durfee Street and Main Street

[Graph showing data with numbers like 10344, 12651, 2250, 6560, 5601, 5921, 2434, 5651]
The Tooele County Health Department (TCHD) Emergency Services Bureau continues to work with our local and regional community partners to mitigate and alleviate the impact of disasters in Tooele County. We do this by providing an open forum promoting cooperation, communication, coordination, and collaboration; and planning for the effective delivery of public health related emergency services to any of our communities that may be affected by disaster.

These stakeholders include surrounding cities and municipalities, county agencies, the Tooele County School District, local Volunteer Organizations Active in Disasters (VOAD), the Tooele Public and Private Partnership (TP3), Mountain West Medical Center, and local EMS, Fire, and Law Enforcement agencies.
EMERGENCY SERVICES BUREAU

HIGHLIGHTS:

TCHD actively works with the Tooele County Emergency Management (TCEM) Department and their associated emergency management partners like Tooele Responds as well.

We also work closely with the other Local Heath Departments (LHDs) throughout the state of Utah and the Utah Department of Health (UDOH) for combined planning and health efforts to keep the public safe.
ENVIRONMENTAL HEALTH DIVISION HIGHLIGHTS:

Household Hazardous Waste Collection Day was a success with 429 total households disposing of household hazardous waste at the annual collection day in May. Hazardous waste such as used oil and antifreeze, batteries, paint, pesticides, and other chemicals were collected and properly disposed of. Electronic waste and prescription medications were also included for disposal. Over 100 pounds of medications were collected and turned over to the Drug Enforcement Agency. In 2019 there were eight Mandatory Air Action days. On Mandatory Air Action days solid fuel burning devices may not be used. Houses contaminated by meth continue to be an issue in Tooele County (and all counties) and we issued 12 decontamination permits for houses to be cleaned in 2019. The health department continues to educate on Radon, a cancer-causing radioactive gas that you can not see, smell, or taste. TCHD sold 160 Radon kits for homes to be tested in 2019. It is important for TCHD to work to keep our physical environment healthy and safe by facilitating proper disposal of hazardous materials, monitoring the air quality, and educating the community on the importance of keeping our homes free from dangerous chemicals.
FAMILY AND SCHOOL HEALTH DIVISION HIGHLIGHTS:

The Community Health Bureau continues to work diligently to prevent influenza and other communicable diseases throughout Tooele County. We provide all epidemiological investigations for food borne illness, sexually transmitted diseases, and tuberculosis. We coordinate with community partners to provide flu vaccination clinics and education to businesses county-wide. We operate a daily immunization clinic offering both child and adult vaccinations. The Community Health Bureau provides targeted case management for families in the community. We increased our clientele by 30 new clients in 2019. We also facilitated breast and cervical cancer screenings for low income women over the age 40. The Community Health Bureau strives to prevent avoidable disease through services and education that ensure quality of life.
FAMILY AND SCHOOL HEALTH DIVISION HIGHLIGHTS:

The School Nursing Bureau was extra busy in 2019. The Utah State Legislature mandated increased school vision screenings for the 2019-2020 school year beginning in August of 2019. The TCHD school nurses have been collaborating with the Tooele County School District (TCSD) to create efficient procedures to provide these mandated vision screenings. There have been multiple planning meetings with TCSD Special Education administration to understand the rule and how best to accomplish these tasks. Trainings were provided to staff and faculty to make this an effective, efficient, and confidential process. The evaluation of this process is continuous and will continue to be in transition as the school nurses and TCSD work together to provide this important screening. In 2019, school nurses provided 1725 Tier 1 and Tier 2 vision screenings in 25 schools, including a Kindergarten through 12th grade online school. School nurses also conducted 30 School Flu Clinics in 2019 giving 2336 flu vaccines.
FAMILY AND SCHOOL HEALTH
DIVISION HIGHLIGHTS:
The Women Infants and Children (WIC) Bureau was recognized for providing an "exemplary" breastfeeding program. They received national recognition by the U. S. Department of Agriculture for their Breastfeeding Support program. The award is called the 2019 Gold Premiere Loving Support Award of Excellence. TCHD's WIC was the only local health department in the state of Utah to receive this award in 2019.

The WIC Bureau Quality Improvement (QI) project was to streamline WIC visits to promote the Targeted Case Management (TCM) program. This program provides resources and assessments for low income families with children under four years old. The goal was to increase visits by 10%. The WIC Bureau was able to exceed this goal increasing numbers by 39%. This was accomplished by the WIC nurses and staff performing TCM visits and referring many of the WIC clients to the TCM nurse.
HEALTH PROMOTION BUREAU
HIGHLIGHTS:

Tooele County Health Department was awarded the National Park Service, Rivers, Trails and Conservation Assistance (RTCA) Grant to assist with advancing the Tooele Valley Active Transportation Plan that Tooele County Commissioners signed into action. The Grant application was a collaborative effort that included Tooele County Trails, BLM and Bike Utah. Bike Utah and Tooele County Health Department hope to help further the 1,000 Miles Campaign, initiated by Governor Herbert, the 1,000 Miles Campaign is to build 1,000 new miles of family-friendly bike paths, lanes, and trails by 2027.
Tai Chi has become such a success in our community Health Promotion collaborated with Aging Services and together they sent three volunteers and one staff member to become certified instructors in Tai Chi for Arthritis. Tai Chi is now being offered nearly year round at both the Tooele and Grantsville Senior Centers. Classes vary throughout the week and are taught in both the morning and afternoon giving participants more opportunities to learn and to practice.

Tai Chi for Arthritis is gentle, low-risk, and easy to learn. Tai Chi for Arthritis helps arthritis by improving muscular strength, flexibility, and fitness. Medical experts designed the program and scientific studies have shown the program to be effective and safe.
HEALTH PROMOTION BUREAU

HIGHLIGHTS:

Tooele County cut the ribbon on one mile of the Tooele Valley Pathway, Rabbit Lane. Tooele County Health Department's Active Transportation Plan, the Tooele Valley Pathway, has a beautiful one-mile section completed. The county put a fresh overlay on the asphalt of Rabbit Lane and put down fresh gravel on each side of the road. Around 9 miles long, the Tooele Valley Pathway was designed as a way to combat obesity, diabetes, and cardiovascular problems that collectively plague Tooele County citizens' health. With the Rabbit Lane portion of the pathway completed, Health Promotion is turning their attention to a patchwork of funding sources to complete the rest of the pathway.
Tooele County Health Department’s Health Promotion Bureau was awarded the Local Health Department award for Outstanding Service and Dedication in their Falls Prevention Program by the Utah Department of Health Violence and Injury Prevention Program. The award read: This organization has been dedicated to falls prevention for many years and has continued to show that dedication by delivering quality programs. They consistently promote and educate the community about all 3 of their falls prevention programs. This organization is always willing to ask questions, learn the programs, and improve program procedures. They have not hesitated at the opportunity to take on the new Otago program and work with their Aging Services to make it a success. Tooele County Health Department is receiving the Local Health Department Award.
Opioid Overdose Prevention was addressed with all pharmacies in Tooele County. All pharmacies were surveyed concerning their enrollment in the Utah Standing Order. The Utah Department of Health (UDOH) issued the standing order in late 2016, giving pharmacists legal authority to provide naloxone to anyone with a higher risk of overdose. Pharmacies who participate in the standing order report the name of each naloxone product dispensed, along with the total number of single doses dispensed to the UDOH. UDOH uses this data to in attaining future opioid funding. Pharmacies that completed the standing order form enrollment then have their locations visible on the map and location listed at naloxone.utah.gov/pharmacists. Several Tooele County pharmacies were not aware of the website and it's resources. Tooele County Health Promotion assisted those needing the information and then notified UDOH of all updates. All Tooele County pharmacies now participate in the Utah Standing Order.
HEALTH PROMOTION BUREAU

HIGHLIGHTS:

Tobacco Prevention and Control Program (TPCP) worked diligently in 2019 with a quick Emergency Rule for the national outbreak of e-cigarette, or vaping, product use-associated lung injury (EVALI). Forty-four stores were visited to ensure compliance with new signs that needed to be posted. TPCP worked with Epidemiologists to address potential cases in Tooele.

TPCP worked with the Tooele County School District to update the tobacco policy for the School District. TPCP, in partnership with the Utah Department of Health, presented two Parents as Partners to address the vaping epidemic with youth in Tooele.

Youth from the Resist Alcohol and Drugs Prevention Advocacy Coalition (RAD PAC) and Wendover Prevention Youth Group attended the Youth Prevention Summit at Snow College. There were eight youth and five leaders.

The leaders of the RAD PAC also presented a RAD PAC Youth Advocate of the Year Award. Courtney has been a member of the coalition for five years and prepared speeches to present at many community events.
HEALTHY SMILES DENTAL CLINIC HIGHLIGHTS:

The Tooele County Healthy Smiles Dental Clinic was formed in response to the significant need for dental care by those who have little or no means of obtaining the dental care they need. During 2019, our Dental Clinic continued to provide multiple services to our local community including: Dentures and Partial Dentures, Examinations, Extractions, Fillings, Fluoride Treatments, and X-Rays. In 2019 there were 583 new patients served, 2895 patient visits, and 721 dentures and partial dentures made.

"I love seeing someone's life change, simply by changing their smile."
- Healthy Smiles Dental Clinic Employee

Dr. Tannon Newland, DDS
