

If you are 70 or older, you can get the COVID-19 vaccine right now!

Call your local health department today to schedule your appointment to get vaccinated.

COVID-19 vaccines are safe and effective. COVID-19 vaccines are an important tool to help us get back to normal.

The benefits of getting vaccinated far outweigh the risks of getting COVID-19.

- Starting **January 18, 2021**, all Utahns age **70 and older** can get vaccinated at your local health department.
- We expect to vaccinate other age groups, and those with underlying medical conditions who have not yet been vaccinated, sometime in March.
- The vaccine should be available for all Utahns sometime in the April to July timeframe.

You need to:

- **Call, or visit the website for your local health department, to schedule an appointment.** You can find the phone number and website for your local health department at <https://coronavirus.utah.gov/vaccine-distribution/#lhd>.
- You don't need to get on a waiting list to get vaccinated, but you must have an appointment. You, or someone you trust, can register for your appointment on your health department's website.
- You can't just show up without an appointment because each local health department may have a different process for registration. **There are limited vaccines, so appointments will fill up quickly. It may take a few tries to get an appointment.**
- Bring a photo I.D. to your appointment.
- Get a 2nd dose of the vaccine a few weeks later. The local health department will tell you when you need to come back for your 2nd shot.

If you have questions about the COVID-19 vaccine, visit coronavirus.utah.gov/vaccine or call the COVID-19 hotline at **1-800-456-7707**.
